

SE 10

- Brake Maintenance
- Hydraulic Devices
- Wheel Alignment
- Tyre Service
- Engineering

Order-No.: **1050**
1051

Type: **E 10**
SE 10

E 10 and **SE 10** are brake maintenance devices with internal 10 liter tank. Hydraulic brake systems and hydraulic couplings of cars, commercial vehicles and motorcycles can be maintained with the bleeding devices. The change of brake fluid is done fast and without any problems.

The complete ventilation of the brake system assures the functional safety of the brake- and ABS systems.

With the **SE 10** the easy movement of the wheel-brake cylinder can be checked and after the repair of the brake- or coupling system a leakage test can be undertaken.

Description:

Optical fill level indication: Sight control and red control light when reaching the minimum level.

Electrical powered pump: After switching-on the pump the pressure builds up slowly. This prevents a „foaming“ of the hydraulic oil with air because of the small flow velocity.

Automatic switch-off of the pump when reaching the minimal capacity. Therefore no air will get into the hydraulic system.

Infinitely adjustable pressure regulation from 0.4 to 3.5 bar with manometer indication and low pressure test (only SE 10).

Pulsating liquid current of the hydraulic oil. These oscillations make a complete ventilation of the pipes possible, because even the smallest air- and humidity locks at the pipe walls are getting carried away.

Automatically pressure decrease when switching off the device. The device can be disconnected from the adapter without pressure by the quick coupling. There is no overflow of the hydraulic oil.

The 3.5 m long inflating hose makes the ventilation possible on every car lift without any problems.

Simple handling, therefore no training is necessary, uncomplicated refilling.

Technical Data:

Electrical connection: 230 V/50 HZ and 12–24V battery

Working pressure: E 10: 2.3 bar

SE 10: infinitely-variable adjust. from about 0.5 to 3.5 bar

Dimensions (LxWxH) in mm: 590x460x650

Weight: about 20.0 kg

Order-No.:

1050 (E 10)

1051 (SE 10)

Scope of delivery:

E 10 / SE 10 including standard adapter 50232.

Accessory:

Catch bottle (50256) and adapter for nearly every common vehicle.

Complete disposal system for used brake fluid.

Modifications and errors reserved, 03/10/2009
